

REQUIRED PROJECT FILES

COMPLETED KNIME WORKFLOW

The screenshot displays the DemoEarlyWarningTool interface, which is used for building and evaluating machine learning models. The interface is divided into several sections:

- Workflow Diagram:** A visual representation of the data processing and modeling pipeline. It starts with a 'CSV Reader' node, followed by 'Column Filter' and 'Table Partitioner' nodes. The data is then split into three parallel paths: 'Random Forest Learner', 'Decision Tree Learner', and 'Logistic Regression Learner'. Each learner is followed by a corresponding predictor node ('Random Forest Predictor', 'Decision Tree Predictor', and 'Logistic Regression Predictor'). The outputs of these predictors are fed into three separate 'Scorer' nodes. A 'Scorer' node also receives input from an 'Add comment' node.
- Confusion Matrix:** A table showing the performance of the model. It has 3 rows and 11 columns. The rows are labeled 'At Risk', 'Not At Risk', and 'Overall'. The columns are labeled 'TruePositives', 'FalsePositives', 'TrueNegatives', 'FalseNegatives', 'Recall', 'Precision', 'Sensitivity', 'Specificity', 'F-measure', 'Accuracy', and 'Cohen's kappa'. The values are as follows:

#	RowID	TruePositives	FalsePositives	TrueNegatives	FalseNegatives	Recall	Precision	Sensitivity	Specificity	F-measure	Accuracy	Cohen's kappa
1	At Risk	6	0	3	0	1	1	1	1	1	1	1
2	Not At Risk	3	0	6	0	1	1	1	1	1	1	1
3	Overall	9	0	9	0	1	1	1	1	1	1	1

- Table of Accuracy Statistics:** A table showing the performance of the model. It has 3 rows and 11 columns. The rows are labeled 'At Risk', 'Not At Risk', and 'Overall'. The columns are labeled 'TruePositives', 'FalsePositives', 'TrueNegatives', 'FalseNegatives', 'Recall', 'Precision', 'Sensitivity', 'Specificity', 'F-measure', 'Accuracy', and 'Cohen's kappa'. The values are as follows:

#	RowID	TruePositives	FalsePositives	TrueNegatives	FalseNegatives	Recall	Precision	Sensitivity	Specificity	F-measure	Accuracy	Cohen's kappa
1	At Risk	6	0	3	0	1	1	1	1	1	1	1
2	Not At Risk	3	0	6	0	1	1	1	1	1	1	1
3	Overall	9	0	9	0	1	1	1	1	1	1	1

GIT COMMANDS AND RESULTS

```
Command Prompt
nce.pdf (100%)

C:\CS0065 IntSys\DemoEarlyWarningTool>git push
Enumerating objects: 5, done.
Counting objects: 100% (5/5), done.
Delta compression using up to 8 threads
Compressing objects: 100% (3/3), done.
Writing objects: 100% (3/3), 542 bytes | 542.00 KiB/s, done.
Total 3 (delta 0), reused 0 (delta 0), pack-reused 0 (from 0)

Asynchronous Activity 1: Student Early Warning Tool Using KNIME

This repository contains the required output for Asynchronous Activity 1. The project uses KNIME to predict student risk status from academic performance data.
